IIC Australian Chapter Membership

For Australia's expert advisory firms and representatives supporting the digital ecosystem

The IIC is regarded as the world's leading neutral policy platform for the digital ecosystem.

This not for profit organisation exists to inform and thereby shape the global policy agenda for the ICT and digital ecosystem. Its members believe that the impact of technological innovation on society should be evaluated and discussed openly and that policy and regulation should both maximise the public interest and promote innovation and investment.

The IIC was established in 1969, with its Australian Chapter formed in 2005. Since that time the Australian Chapter has been instrumental in providing a neutral platform for discussion and debate surrounding key technology, media and telecommunications policy developments on a local and international scale.
